# AWARDS AND CERTIFICATIONS

# ACCLIVET<sup>®</sup>

Building on decades of extensive experience in the in vitro Diagnostics industry, we are dedicated to enhancing the quality of animal care through precise diagnostics for veterinarians worldwide. With a profound commitment to excellence, we strive to offer pioneering diagnostic solutions for veterinarians specializing in Companion and Livestock animals.

## FEATURES AND BENEFITS

- ▶ Rapid - One Step Immunochromatographic assays
- ▶ Accurate - High sensitivity and good correlation with other test methods
- ▶ Simple to use - One step after sample collection
- ▶ Fast - Reliable result in 10 minutes
- ▶ Immediate - Treatment and Management (vaccination/quarantine) after identifying the cause
- ▶ Economical kit size - 10T | 25T
- ▶ Shelf Life 24 months
- ▶ Storage +2°C - +30°C No refrigeration required

# ACCUVET<sup>®</sup> PLUS

**Confirmation Assured!**  
(Veterinary Real Time PCR Kits)  
Next - Level Accuracy

- ✓ Easy and Simple
- ✓ Accurate and high specificity
- ✓ High sensitivity
- ✓ Available as single and multiplex formats

Nucleic acid Extraction Kit (DNA/RNA) are available

Welcome to Accuvet plus Veterinary Real-Time PCR Kits, where advanced diagnostic tools meet the forefront of veterinary medicine. Our innovative kits are meticulously crafted for the precise detection and quantification of specific nucleic acid targets in animals, employing the highly sensitive and specific real-time PCR (polymerase chain reaction) technique.

### **TARGETED PATHOGENS:**

Accuvet Plus offers a comprehensive range of kits designed to identify various animal pathogens. From viruses like canine parvovirus and feline leukemia virus to bacteria such as *Mycoplasma* spp. and parasitic agents, our kits cover a broad spectrum.

### **SENSITIVITY AND SPECIFICITY:**

Our ACCUVET Plus real-time PCR kits provide exceptional sensitivity, capable of detecting even a minimal number of target nucleic acid copies in a sample. Specific primers and fluorescent probes ensure high specificity, minimizing the risk of false-positive or false-negative results.

### **QUANTIFICATION:**

Accuvet Plus empowers you to quantify the amount of target nucleic acid in a sample, aiding in disease monitoring and assessing infection severity. Standard curves or reference materials included in our kits facilitate accurate quantity estimations.

### **MULTIPLEXING:**

Efficiency is paramount. Our kits support multiplexing, allowing the simultaneous detection of multiple target sequences in a single reaction. This feature streamlines the identification of various pathogens or genetic markers in a single sample, saving both time and resources.

### **SAMPLE TYPES:**

Versatility is key. Accuvet plus Veterinary Real-Time PCR Kits are compatible with a variety of sample types commonly collected from animals, including blood, serum, plasma, nasal swabs, feces, and tissue samples. Specific sample type requirements may vary based on the target pathogen.

### **KIT COMPONENTS:**

Our kits come complete with all the necessary reagents for the PCR reaction, including primers, fluorescently labeled probes, PCR master mix, and positive/negative controls. Some kits may also provide pre-validated protocols and software for result analysis. Elevate your veterinary diagnostics with Accuvet Plus – ensuring accuracy, reliability, and efficiency in the detection and monitoring of infectious diseases in animals.
